

Focused on You.

There's no place like home. The comfort of familiar surroundings and being close to loved ones and friends. When the time comes that you or a loved one need a bit – or a lot – of assistance to live independently and safely at home, Concord Regional VNA can help.

Whether 'home' is a single-family residence, a retirement community or an assisted living facility, we can provide services and teach you and your care partner skills to help you remain there, including:

- Assist with medication changes and management
- Manage conditions such as heart failure, COPD, and diabetes
- Support for intravenous medications and nutrition
- Care of wounds such as diabetic ulcers, pressure ulcers and others
- Plan post-surgical needs, such as mobility, activities of daily living, and incision site care
- Specialized therapy for lymphedema, vestibular, joint replacement, and other orthopedics
- Advanced Illness Management Program for difficult-to-manage symptoms
- Home safety and fall risk evaluation

When you choose Concord Regional VNA for Home Care services, you can expect highly-qualified, caring and compassionate professionals who will coordinate with your doctor and will provide care to meet your specific needs.

Our admissions team is available by telephone seven days-per-week, 24 hours-per-day, year-round and we strive to provide services within 24 hours of receiving doctor's orders.
