

Focused on You & Your Child

When your child requires assistance or support, Concord Regional VNA is here to help.

If your child has physical impairments or a chronic condition, or is in need of nursing or therapy services, our professional and caring team of nurses, therapists and social workers can assist you and your child in the comfort of your home. We provide services to children from birth through teen years, including:

- Medication management, including intravenous medication
- Education to help you manage your child's chronic condition
- Recovery following a traumatic injury or surgery
- Support for nutritional needs, including enteral feeding
- Occupational therapy to assist with daily activities
- Physical therapy to help build or restore strength and physical functions
- Speech therapy to help develop or restore functional speech, voice, language, communication and swallowing
- Education on safety and injury prevention

We also conduct in-home visits to expecting and new parents to offer support and guidance on how to care for a newborn, including:

- Information on family planning, infant preventative health needs and when to call a physician
- Prenatal and postnatal care and support
- Assistance with breastfeeding
- Short-term counseling

Our team can help you prepare for the new addition to your family and help you understand your child's new or existing diagnosis. We will work closely with you to teach you the skills you need to achieve your family's goals.
